

## Environmental Policy

**Eirmis Solutions recognises its responsibility to the environment. We shall insure compliance with both current and future legislation and where appropriate we will be compliant to the appropriate codes of practices.**

We are committed to minimising the environmental impact of our operations and continue to operate side by side with our neighbours, partners and clients. In particular we will achieve this through our commitment to:

- Reduce the amount of waste produced by removing the use and need for paper in our business as well as offer device recycling through our partners.
- Only working with partners that can ensure services are provided in an environmentally friendly way. I.e., powered by renewables.
- Review and enforce our sustainable procurement policy to align with good practice.
- Work closely with environmental advisors and regulators to improve our overall environmental credentials and ensure ongoing conservation of sensitive ecosystems for which we are responsible.

Our small business will foster environmental awareness and understanding in all employees, suppliers, customers and partners. Where practicable the business will provide information and assistance to customers on environmental issues arising from the products and services which we offer.

Improvement will be continuous, and the business will report internally and externally on its progress against its goals and objectives.
